

Truck Wheel Nut Cracker Torque Multiplier 68:1

Product Code: VP1121

- Easy to use
- Choose socket size that fits nut to be removed
- Place wrench with foot to the right when undoing right hand threads and crank clockwise. For left hand threads, place wrench with foot to the left and crank anti-clockwise.
- After nut has been loosened, use extension bar to remove nuts quickly.
- Reverse the procedure when tightening.
- Loosen the tightest of nuts effortlessly and re-torque them back up correctly.
- Do not overtighten nuts
- Supplied in two compact carry cases.
- Not to be used in conjunction with air, power or impact tooling. (Hand operated only)
