

Hydraulic Post Hole Digger

Very sturdy construction and requires minimal maintenance.

A standard 8" hydraulic ram is used for down pressure.

A heavy duty framework is solidly bolted to the rear of the tractor.

Driving the auger is a heavy duty P.T.O. shaft with a clutch going through a heavy duty right angle drive gearbox.

**Post Hole Digger including back frame
(No mounting points on framework for tractor, without
hydraulic ram or auger)**

Painted (Undercoated only): \$5,500 inc. GST

These augers are available in the following sizes:

Double cut augers: 4", 6", 8", 9", 10", 12", 15", 18" and 24"
